FIG. 19 is a schematic diagram of a device 10, likely a camera or sensor module, showing internal components and a coordinate system. The device 10 is depicted as a rectangular housing with various internal parts labeled. A coordinate system is shown at the bottom left with axes X1, X2, Y1, and Y2. Key components and labels include:

- 10**: The overall device or housing.
- 40**: A central vertical component, possibly a lens or sensor.
- 50**: A component on the right side, possibly a shutter or actuator.
- 51**: A component on the left side, possibly a shutter or actuator.
- 60**: A large rectangular area at the bottom, possibly a sensor or filter.
- 65**: A component on the left side, possibly a shutter or actuator.
- 70**: A component on the left side, possibly a shutter or actuator.
- 74**: A component on the left side, possibly a shutter or actuator.
- 78**: A component on the right side, possibly a shutter or actuator.
- 103**: A component on the right side, possibly a shutter or actuator.
- 105**: A component on the right side, possibly a shutter or actuator.
- 106**: A component on the right side, possibly a shutter or actuator.
- 108**: A component on the right side, possibly a shutter or actuator.
- 113**: A component on the right side, possibly a shutter or actuator.
- 13**: A dashed line indicating a path or boundary.
- 14**: A dashed line indicating a path or boundary.
- 14a**: A circular component in the center, possibly a lens or sensor.
- 15**: A dashed line indicating a path or boundary.
- 16**: A component on the right side, possibly a shutter or actuator.
- 17**: A component on the left side, possibly a shutter or actuator.
- 60**: A large rectangular area at the bottom, possibly a sensor or filter.
- P6**: A point or location on the right side.
